Section II. Conditions of Contract

1. Definitions

1.1 In this contract, the following terms shall be interpreted as indicated:

a. "The Contract" means the agreement entered into between the Purchaser and the Supplier, as recorded in the Contract Form Signed by the parties, including all attachments and appendices thereto and all documents incorporated by reference therein;

b. "The Contract Price" means the price payable to the Supplier under the contract for the full and proper performance of its contractual obligation;

c. "The Goods" means Equipment and related Accessories and spare-parts or any other materials which the Supplier is required to supply to the Purchaser under the contract;

d. "Services" means services ancillary to the supply of the goods such as transportation and insurance including the installation, commissioning and the operational and maintenance training of the supplied equipment.

e. "The Purchaser" means the procuring entity purchasing the goods;

f. "The Supplier" means the organization supplying the goods and services under this contract.

2. Technical Specification

2.1 The goods supplied under this contract shall confirm to the standards mentioned in the Technical Specification.

3. Patent Right

3.1 The Supplier shall indemnify the Purchaser against all third-party claims of infringement of patent, trademark or industrial design rights arising from use of goods or any part thereof in the Purchaser's country.

4. Inspection and Tests

4.1 The Purchaser or its Representative shall have the right to inspect and/or test the goods to confirm their conformity to the Technical Specification and the quality of performance after the supply and delivery of good to the Purchaser's premises.

5. Packing

5.1 The Supplier shall provide such packing of the goods as is required to prevent their damage or deterioration during transmit to their final destination as indicated in the contract.

5.2 The packing shall be sufficient to withstand, without limitation, rough handling during transit and exposure to extreme temperatures, salt and precipitation during transit and open storage.

5.3 The packing, marking and documentation within and outside the packages shall comply strictly with such special requirements as shall be expressly provided in accordance with international standard and practice.

6. Delivery of Goods

6.1 Delivery of the goods shall be made by the Supplier in accordance with the terms specified by the Purchaser in its Schedule of Requirements.

7. Warranty

7.1 The Supplier warrants that all the goods supplied under the contract shall fully comply with the specification laid down in the contract.

7.2 The warranty shall remain valid for one year after the goods have been delivered to the final destination indicated in the contract, and accepted by the Purchaser after installation and commissioning of

equipment by the Supplier.

7.3 The Purchaser shall promptly notify the Supplier in writing of any claims arising under this warranty.

7.4 Upon receipt of such notice, the Supplier shall, with all reasonable speed, replace the defective goods without cost to the Purchaser. The Supplier will be entitled to remove, at its own risk and cost, the defective goods.

8. Payment

8.1 Payment of the goods supplied shall be made in Nepali Rupees after the delivery and installation and commissioning of goods to the satisfaction of the Purchaser.

8.2 Payment shall be made within fifteen (15) days of receipt of the goods and upon submission of claim supported by the acceptance certificate issued by the Purchaser. .

9. Prices

9.1 Prices charged by the Supplier for goods delivered under the contract shall not vary from the prices quoted by the Supplier in its price quotation.

10. Insurance

The Purchaser will be responsible for taking out any appropriate insurance coverage.

11. Governing Language

11.1 The Governing Language shall be: Nepali or English

12. Applicable Law

12.1 The applicable law shall be Laws of Nepal.

13. Notices

13.1 Purchaser's address for notice purposes:
Nepal APF Hospital, Procurement Section, Kathmandu.
Tel-01-4315224, 4313600, email-apfhospital.procurement@gmail.com.

13.2 Supplier's address for notice purposes: .....

14. Taxes and Duties

14.1 The Supplier shall be entirely responsible for all taxes, duties, licence fees and other such levies imposed by the GoN.

15. Operation, Maintenance and Spare-parts Manuals

15.1 The successful Supplier shall supply 2 copies of manufacturer's operation, maintenance and spare-part manuals of the goods (Equipment).

16.Conduct of Suppliers

16.1 The Supplier shall be responsible to fulfil his obligations as per the requirement of the Contract Agreement, Bidding documents, GoN's Procurement Act and Regulations.

16.2 The Supplier shall not carry out or cause to carryout the following acts with an intention to influence the implementation of the procurement process or the procurement agreement :

a. give or propose improper inducement directly or indirectly,
b. distortion or misrepresentation of facts
c. engaging or being involved in corrupt or fraudulent practice
d. interference in participation of other prospective bidders.
e. coercion or threatening directly or indirectly to impair or harm, any party or the property of the party involved in the procurement proceedings,
f. collusive practice among bidders before or after submission of bids for distribution of works among bidders or fixing

artificial/uncompetitive bid price with an intention to deprive the Purchaser the benefit of open competitive bid price..

g. contacting the Purchaser with an intention to influence the Purchaser with regards to the bid or interference of any kind in examination and evaluation of the bids during the period after opening of bids up to the notification of award of contract

17.Blacklisting Supplier

17.1 The GoN, Public Procurement and Monitoring Office(PPMO) may blacklist a Supplier for his conduct up to three years on the following grounds and seriousness of the act committed by the supplier:

a. if it is proved that the supplier committed acts pursuant to the Sub - clause 16.2,
b. if it is proved later that the supplier had committed substantial defect in implementation of the contract or had not substantially fulfilled his obligations under the contract or the completed work is not of the specified quality as per the contract ,
c. if convicted by a court of law in a criminal offence which disqualifies the supplier from participating in the contract.

17.2 A Supplier declared blacklisted and ineligible by the GON shall be ineligible to bid for a contract during the period of time determined by PPMO.

18. Dispute Resolution

18.1 Any dispute arising out of the Contract, which cannot be amicably settled between the parties, shall be referred to adjudication.

Section III.Schedule of Requirements

S.N.	Description	Quantity	Place of Delivery	Delivery schedule	Suppliers Offer
1.	Intensive Care Bed	20 set	Nepal APF Hospital, Procurement Section, Kathmandu	As soon as possible from the date of contract sign	
2.	IV Stand	40 set		As soon as possible from the date of contract sign	
3.	Defibrillator	1 set		As soon as possible from the date of contract sign	
4.	Portable x-ray	1 set		As soon as possible from the date of contract sign	
5.	Air mattress	20 pc		As soon as possible from the date of contract sign	
6.	Patient Trolley	2 set		As soon as possible from the date of contract sign	
7.	Wheel chair	4 set		As soon as possible from the date of contract sign	
8.	Bi pap machine	2 set		As soon as possible from the date of contract sign	
9.	Nebulizer	8 set		As soon as possible from the date of contract sign	
10.	Suction Machine	8 set		As soon as possible from the date of contract sign	
11.	X ray view box	4 set		As soon as possible from the date of contract sign	
12.	ECG machine	1 set		As soon as possible from the date of contract sign	
13.	Bain circuit	4 set		As soon as possible from the date of contract sign	
14.	T piece	8 set		As soon as possible from the date of contract sign	
15.	Laryngoscope Set	2 set		As soon as possible from the date of contract sign	
16.	Tracheostomy tube Different size	1 set		As soon as possible from the date of contract sign	
17.	ET tube different size with subglottic suction plug Port	30 set		As soon as possible from the date of contract sign	
18.	Pulse oximeter	3 set		As soon as possible from the date of contract sign	
19.	Stethoscope	20 set		As soon as possible from the date of contract sign	
20.	BP apparatus	4 set		As soon as possible from the date of contract sign	
21.	Electric needle destroyer	2 set		As soon as possible from the date of contract sign	
22.	Autoclave 800 Ltr.	1 set		As soon as possible from the date of contract sign	
23.	Electronic weighing machine	1 set		As soon as possible from the date of contract sign	
24.	AMBU bag with reservoir bag	4 set		As soon as possible from the date of contract sign	

25.	hemodialysis unit	1 set	Nepal APF Hospital, Procurement Section, Kathmandu	As soon as possible from the date of contract sign	
26.	Resuscitation cart	2 set		As soon as possible from the date of contract sign	
27.	Closed Suction catheter	30 set		As soon as possible from the date of contract sign	
28.	Glucometer With Strips	2 set		As soon as possible from the date of contract sign	
29.	Noninvasive Ventilator Mask	12 set		As soon as possible from the date of contract sign	
30.	oropharyngeal airway Different Sizes	30 set		As soon as possible from the date of contract sign	
31.	nasopharyngeal airway	10 set		As soon as possible from the date of contract sign	
32.	Venturi Mask (Different) Fio2	20 set		As soon as possible from the date of contract sign	
33.	Ventilating Face Mask (Anesthetic Mask) Different Size	10 set		As soon as possible from the date of contract sign	
34.	Refrigerator 185 Ltr	2 set		As soon as possible from the date of contract sign	
35.	Blood warmer / Fluid Warmer	5 set		As soon as possible from the date of contract sign	
36.	Physiotherapy Chest Vibrator	2 set		As soon as possible from the date of contract sign	
37.	Intermittent Pneumatic Compression Device	2 set		As soon as possible from the date of contract sign	
38.	Forced Air Warmer Device (patient warmer device)	3 set		As soon as possible from the date of contract sign	
39.	Bedside Locker	20 set		As soon as possible from the date of contract sign	
40.	Mayo Table	20 set		As soon as possible from the date of contract sign	
41.	infrared thermometer (Non Touch)	5 pc		As soon as possible from the date of contract sign	
42.	Gum elastic Bongie	2 set		As soon as possible from the date of contract sign	
43.	Intubatins Stylets	5 set		As soon as possible from the date of contract sign

Technical Specification of Intensive Care Beds

S.N.	Purchaser's Specifications	Bidder's Proposed Specification	Deviation If Any	Page no in catalog/ Data sheet
	Motorised ICU beds			
	Manufacturer			
	Brand			
	Type/Model			
	Country of Origin			
1	**Description of Function**			
1.1	Motorised ICU bed is a bed specially designed for hospitalized patients in ICU,CCU or recovery unit who are in need of patient ease. These beds have special features both for the comfort and well being of the patient and for the convenience of hospital staff.			
2	**Operational Requirements**			
2.1	It shall have anti-corrosive and antirust treated baked hard epoxy powder coating, four sections Monitorised ICU bed.			
3	**System Configuration**			
3.1	Monitorised ICU bed, four sections with mattress.			
4	**Technical Specifications**			
4.1	Dimensions approx.: 2220Lx995Wx450H-820H mm (without mattress).			
4.2	Bed frame shall be mainly made from approx. 50mm x 25mm x 2mm thick ERW tubes with proper support. This frame should be fitted on the base frame mainly made of approx. 60X30X1.6mm ERW tube on various supporting links.			
4.3	The base frame shall be mounted on 150 mm dis non-rusting twin wheel castor with Central locking mechanism.			
4.4	Four sections Polypropylene detachable top fitted on four section top bed frame with perforated design for easy breathing of mattress.			
4.5	Back rest and leg rest both shall have detachable mattress guards. (3 nos on each section respectively)			
4.6	Back rest knee rest and height adjustment approx. (450mm -770mm) position operated by electromechanical adjustment through handset, and additional nurses' control handset , for operating and locking of above function and shall have trendelenburg/reverse trendelenburg positions.			
4.7	Simultaneous electromechanical adjustment

S.N.	Purchaser's Specifications	Bidder's Proposed Specification	Deviation If Any	Page no in catalog/ Data sheet
	of back rest and knee rest on both hand set and the additional nurse's hand set.			
4.8	One touch key for flattening of the bed at the lowest height for CPR on nurses' hand set.			
4.9	Battery backup with inbuilt battery charger shall be provided.			
4.10	The hand set and nurses' hand set shall have indications for power on and the battery charge.			
4.11	Manual pull lever on both side of bed to quickly bring bed to a flat position.			
4.12	Bed shall have split type swing down railing, two on each side (Head and middle section) made from polymer moulded material.			
4.13	Railings shall avoid any finger and neck entrapments.			
4.14	Detachable head/foot board.			
4.15	Bed frame must be sturdy and stable to support weight of at least 250 kg.			
4.16	High quality stainless steel outer covering tube with a knob to mount Syringe pump.			
4.17	There must be suitable buffer mechanism to avoid heating of the bed to the wall.			
4.18	It must have provision of fixing suitable rod for hanging intravenous/irrigation fluid bottle on both sides at head end and foot end.			
4.19	It must have hook on bed frame on both sides for holding urine/ drainage bag (at least 4 nos.)			
4.20	Shall provide with one dual hook 304-grade stainless steel telescopic IV rod.			
4.21	**Mattress:** Shall provide with one four section mattress of dimensions approx. 85X195 cm with washable cover of good quality. The mattress must be made of high density PU foam of 12cm thickness.			
5	**Electrical specification**			
5.1	Nominal 230V AC			
5.2	Switch mode power supply operating range 90V-300V; 47/63Hz; Max 2A.			
5.3	Should comply with international standards for electric shock protection and liquid ingress protection.			
6	**System Configuration Accessories, spares and consumables**			
6.1	All standard accessories/consumables/parts required for the proper operation of the above item shall be included in the offer.

9. Defibrillator

S.N.	Purchaser's Specifications	Bidder's Offer/ Statement of Compliance	Page no. of catalogue/ datasheet/ manual
	Automated External Defibrillator (AED)		
	Manufacturer		
	Brand		
	Type/Model		
	Country of Origin		
1	**Description of Functions**		
1.1	Defibrillator to be used to give electrical shocks to the patient's chest assisting theheart to resume its co-ordinated atria-ventricular pump function, in thecontext of advanced cardiac life support.		
2	**Operational Requirements**		
2.1	It shall operate on internal replaceable batteries.		
3	**System Configurations**		
3.1	Automated External Defibrillator (AED) with complete accessories,for adult paediatric and infant use.		
4	**Technical Specifications**		
4.1	It shall be portable Automated External Defibrillator (AED) for immediate operation, self-explanatory and based on intuitivelyunderstood design features.		
4.2	Shock and splash resistant housing allows functioning in demanding environment.		
4.3	Shall perform self-test when device is switched on and shall indicate ready for use. Self-test is performed upon each switched on ready-for-use is indicated		
4.4	It shall have capability of automated assessment and analysis, adequately sensitive and specific forchildren and adults.		
4.5	The device shall have facility of step-by-step guidance from the large pictograms when it is on		
4.6	It shall analyse, shock with self-adhesive external pads, colour coded, each with pictogram.		
4.7	It shall have automated direct defibrillation with biphasic waveform, máximum energy approximately 150J.		
4.8	It shall have built-in load compensation algorithm adjusts energy delivery accordingpatient's impedance.

9. Defibrillator

S.N.	Purchaser's Specifications	Bidder's Offer/ Statement of Compliance	Page no. of catalogue/ datasheet/ manual
4.9	Shall come with standard pads fit for children (> 8 year or > 25kg) and adults.		
4.10	For infants (> 1 year or > 6kg) shall come with attenuation pads, reductionto maximum approximately 50J.		
4.11	It shall have pads with plug and power cord, length approximately 100cm		
4.12	It shall have built-in audible metronome assists Cardiac Pulmonary Resuscitation (CPR)reports, with audio-visual alerts of operational status, malfunctions(electrodes) and low battery status.		
4.13	Facility of internal safety discharge of accumulated energy upon 20sec non-delivery,switch-off or malfunction		
4.14	Battery capacity approximately 100 shocks of 250J.		
5	**Accessories, Spare Parts and Consumables**		
5.1	**Accessories:** • 1 x Set of children, adult self-adhesive external pads, colour coded, • with pictogram • 1 x Set of infant attenuated adhesive external pads, colour coded, with • pictogram • 1 x CD-ROM with training material • 2 x Set of spare batteries 9 V PP3 / 6LR61 (separately packed) or long life lithium manganese oxide battery. • 1 x Carry case with storage pocket for leads and other accessories		
5.2	All standard accessories, consumables and parts required to operate the equipment, including all standard tools and cleaning and lubrication materials, to be included in the offer. Bidders must specify the quantity of every item included in their offer (including items not specified above).		
6	**Operating Environment**		
6.1	The system offered shall be designed to operate normally under the conditions of the purchaser's country. The conditions include Power Supply,		

सशस्त्र ...

अस्पताल प्रमुख

9. Defibrillator

S.N.	Purchaser's Specifications	Bidder's Offer/ Statement of Compliance	Page no. of catalogue/ datasheet/ manual
	Climate, Temperature, Humidity, etc.		
6.2	Power supply: It shall operate on internal replaceable batteries, type 9V PP3 / 6LR61 or M5070A type lithium long life battery.		
7	**Standards & Safety Requirements**		
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**		
7.2	CE (93/42 EEC Directives) or USFDA approved product certificate.		
7.3	Comply to AHA & ACLS requirements or shallmeet AAMI DF80 guidelines and AHA recommendations for adult defibrillation (Circulation 1997; 95:1677-1682).		
8	**User Training**		
8.1	The Supplier shall conduct user training for this equipment to enable operators to use the equipment properly. The training shall include the use of all operational functions of the equipment, as well as routine checks and maintenance expected by users.		
9	**Warranty**		
9.1	Comprehensive warranty for 2 years after acceptance.		
10	**Maintenance Service During Warranty Period**		
10.1	During the warranty period supplier must ensure planned preventive maintenance (PPM) along with corrective/breakdown maintenance whenever required.		
11	**Installation and Commissioning**		
11.1	The bidder must arrange for the equipment to be installed and commissioned by certified or qualified personnel; any prerequisites for installation to be communicated to the purchaser in advance, in detail.		
12	**Documentation**		
12.1	User (Operating) manual in English

10. Portable X-ray

S.N.	Purchaser's Specifications	Bidder's Offer
	X-Ray Machine Mobile, 6KW or More	
	Manufacturer	
	Brand	
	Type/Model	
	Country Of Origin	
1	**Description of Function**	
1.1	Mobile X-Ray Unit is required to perform X-Ray studies in Emergency and trauma departments and at bedside in wards and ICU.	
2	**Operational requirements**	
2.1	Compact, lightweight, easily transportable mobile radiographic unit suitable for bedside X-ray for trauma units (accidental cases), intensive care units, operation theatres and also in the Radiology department for conventional radiography.	
3	**System Configuration**	
3.1	X-ray Machine Mobile, 6KW or more complete unit and with complete accessories.	
4	**Technical Specifications**	
4.1	**The Generator:** • Microprocessor-controlled high frequency generator. • Max output: not less than 6kW at 125kv, 100ms • Voltage range: 40 - 125kV in more than 25 steps. • Max tube current: 250mA • mAs range: 0.5 - 200mAs in more than 30 steps • Minimum Exposure time: not more than 5ms • Soft touch key operations • Anatomical Programmable Radiographic mode shall be available.	
4.2	**X-Ray Tube:** • Rotating anode type • Anode rotation: 2800rpm • Anode heat capacity: not less than 100 kHU • Dual focal spot: not more than 0.8mm	
4.3	**Collimator:** • Manually adjustable multi-leaf collimator, rotatable ±90° • Collimator light halogen lamp: 180 lux at 1m SID	
4.4	**Tube positioning:** • Max tube height: not less than 1800mm, • Min tube height: not more than 450 mm • Max horizontal extension: not less than

	800mm	
4.5	The unit shall have counter balanced arm system	
4.6	Shall have remote control of exposure to protect operator.	
4.7	It shall have cassette compartment of holding about 8 pieces of 35x43cm cassettes.	
4.8	The unit must have an effective braking system for parking, transport and emergency braking.	
4.9	The unit shall come with overload protection device.	
5	**Accessories, spares and consumables**	
4.1	**Accessories:** • Lead apron lightweight- 1 nos. • Grid(Ratio 6:1) of 12"x15" and 10"x12": 01 each. • Remote control kit: 01 no.	
5.2	All standard accessories, consumables and parts required to operate the equipment, including all standard tools and cleaning and lubrication materials, to be included in the offer. Bidders must specify the quantity of every item included in their offer (including items not specified above).	
6	**Operating Environment**	
6.1	The system offered shall be designed to operate normally under the conditions of the purchaser's country. The conditions include Power Supply, Climate, Temperature, Humidity, etc.	
6.2	Power supply: 220 – 240 VAC, 50Hz fitted with 5m automatic retractable power cable for easy connection to any wall outlet with protective ground conductor.	
7	**Standards and Safety Requirements**	
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**	
7.2	CE (93/42 EEC Directives) or USFDA approved product certificate.	
7.3	Shall meet: • IEC 60601-1-3 - Part 1: General Requirements for safety - Collateral Standard: General Requirements for Radiation Protection in Diagnostic X-Ray Equipment. • IEC 60601-2-7 - Part 2-7: Particular Requirements for the Safety of High-Voltage Generators of Diagnostic X-Ray Generators.	
8	**User Training**	
8.1	Must provide user training (including how to use and maintain the equipment).	
9	**Warranty**	
9.1	Comprehensive warranty for 2 years

11. Air Mattress

S.N.	Purchaser's Specifications	Bidder's Offers
	Air Mattress with electric air pump	
	Manufacturer	
	Brand	
	Type / Model	
	Country of Origin	
1	**Description of Function**	
1.1	The *medical air mattresses with airpump* is useful in preventing or treating serious ailments related to extended bed rest, such as pressure sores and skin shearing.	
2	**Operational Requirements**	
2.1	Inflatable air mattress with electric air pump	
3	**System Configuration**	
3.1	Inflatable air mattress with electric pump with complete accessories.	
4	**Technical Specifications**	
4.1	Should be made of medical grade PVC material, comfortable and skin friendly	
4.2	Should support weight up to 100kg or more.	
4.3	Pump should have low noise	
5	**Accessories, spares and consumables**	
5.1	High quality electric air pump	
6	**Operating Environment**	
6.1	The product offered shall be designed to be stored and to operate normally under the conditions of the purchaser's country. The conditions include Climate, Temperature, Humidity, etc.	
7	**Standards and Safety Requirements**	
7.1	Must submit ISO 9001 or ISO 13485:2003/AC:2007 **AND**	
8	**User Training**	
8.1	The Supplier shall conduct user training for this equipment to enable operators to use the equipment properly.	
9	**Warranty**	
9.1	Warranty for 1 year.	
10	**Maintenance Service During Warranty Period**	
10.1	Standard warranty conditions are applicable.	
11	**Installation and Commissioning**	
11.1	Supplier must accomplish proper installation &commissioning of equipment	
12	**Documentation**	
12.1	User /instructions manual in English.

	Country of Origin	
1	**Description of Function**	
1.1	Patient Trolley is required for Patient transfer to & froICU/OT/Emergency.	
2	**Operational Requirements**	
2.1	Patient trolley with pneumatic adjustment for back section & hydraulic adjustment for height.	
3	**System Configuration**	
3.1	Patient trolley with mattress and with complete accessories.	
4	**Technical Specifications**	
4.1	Must have three sectional mattress base made of X Ray translucent high pressure laminate with facility to insert X Ray Cassette from either sides & ends of the trolley.	
4.2	Must be able to X Ray the patient from positions along the entire length and width of the trolley.	
4.3	Must have pneumatic step less adjustment for back section, Trendelenburg, reverse Trendelenburg and foot section.	
4.4	Must have hydraulic height adjustment with a foot paddle on either side of the trolley	
4.5	Frame must be made up of epoxy powder coated steel	
4.6	Must have Central braking system with steering facility	
4.7	Must be equipped with 360 deg. swivelling heavy duty castors diameter 150 mm.	
4.8	Must have bumpers at all the four corners of the trolley	
4.9	Must have facility to fix IV rod at all the four corners and middle of mattress base frame.	
4.10	Must have place for fixing 'B' Type Oxygen Cylinder	
4.11	**Dimensions, Approx. ±10%:** • Max. Length : 2000-2100 mm • Max. Width : 730-750 mm • Height : 535 – 905 mm • Trendelenburg : 14-20^0 step less • Anti Trendelenburg : 7-10^0 step less • X ray viewing area : entire length	
5	**Accessories, spares and consumables**	
5.1	**Accessories:** • Anti-static Hygienic, washable Mattress (80mm thick) with pull straps, 01 pc • Collapsible Side Rails, 01 pair • Stainless steel I.V. Rod 01 pc • Cylinder Holder for 'B' Type Oxygen Cylinder.01 pc	
5.2	All standard accessories/consumables/parts required for the proper operation of the above item shall be included in the offer. Bidders shall specify, in a separate Excel worksheet, the quantity and details of any items included in this offer which have not been specified in this

12. Technical Evaluation Report of Wheel Chair

S.N.	Purchaser's Specifications	Bidder's Offer	Bidder's Offer
	Wheel Chair (foldable)		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Basic wheelchair for transportation of patients who are unable to stand/walk.		
2	**Operational Requirements**		
2.1	Basic foldable wheelchair for adult use.		
3	**System Configuration**		
3.1	Wheel Chair (foldable).		
4	**Technical Specifications**		
4.1	Heavy carriage mounted on 4 ball-bearing wheels.		
4.2	Front wheels free rolling, 360 degrees swivel.		
4.3	Both rear wheels with brake.		
4.4	Foot lever, integrated in frame, facilitates tilting the wheelchair.		
4.5	Two handles at the rear fit with plastic rims.		
4.6	Swing-away foot and arm supports for easy stepping on/off.		
4.7	Armrests seat and back are upholstered.		
4.8	**Materials:** • High resistance to corrosion (tropical environment). • Frame: Chrome-plated tubular steel. • Upholstery: Plastic, flexible highly tear resistant, anti-static, flame retardant, disinfectant- and liquid proof, washable. • Tires: Heavy duty solid rubber.		
4.9	**Dimensions, Approx. ± 10%:** • Overall: 450 x 500 x 870mm (d x w x h). • Back support: 500 x 400mm (w x h). • Frame, diameter: 23mm. • Wheels, diameter: Front 200mm, Rear 600mm. • Carrying capacity: Approximately 150kg.		
5	**Accessories, spares and consumables**		
5.1	All standard accessories, consumables and parts required to operate the equipment, including all standard tools and cleaning and lubrication materials, to be included in the offer. Bidders must specify the quantity of every item included in their offer (including items not specified above).		
6	**Operating Environment**		
6.1	The product offered shall be designed to be stored and to operate normally under the conditions of the purchaser's country. The conditions include

S.N.	Purchaser's Specifications		Bidder's Offer
	BIPAP (Bi-level Positive Airway Pressure)		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	BIPAP stands for Bi-level Positive Airway Pressure. It is a breathing apparatus that helps people get more air into their lungs.		
2	**Operational Requirements**		
2.1	Integrated display screen shall display easy-to-read real time graphics in waveform or bar scale format the measured and calculated parameters.		
3	**System Configuration**		
3.1	BIPAP (Bi-level Positive Airway Pressure), complete unit with all standard accessories.		
4	**Technical Specifications**		
4.1	Machine shall be based on the solenoid valve technology and shall offer preferably auto track sensitivity and adjustable rise time.		
4.2	IPAP: approx. 4 to 30cmH2O.		
4.3	EPAP: approx. 4 to 25cmH2O.		
4.4	Breath rate: approx.0 to 30BPM with spontaneous for time mode.		
4.5	Timed inspiration: approx. 0.5 to 3.0s.		
4.6	Rise time: approx. 100 to 600ms.		
4.7	Shall have facility for upgrades.		
5	**Accessories, spares and consumables**		
5.1	All standard accessories, consumables and parts required to operate the equipment, including all standard tools and cleaning and lubrication materials, to be included in the offer. Bidders must specify the quantity of every item included in their offer (including items not specified above).		
6	**Operating Environment**		
6.1	The product offered shall be designed to be stored and to operate normally under the conditions of the purchaser's country. The conditions include Power Supply, Climate, Temperature, Humidity, etc.		
6.2	Power supply: 220 – 240 VAC, 50Hz fitted with appropriate plug. The power cable must be at least 3 metre in length.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**		
7.2	CEceritificate should be submitted.		
8	**User Training**		
8.1	Must provide user training (including how to use and maintain the equipment).		
9	**Warranty**		
9.1	Comprehensive warranty for 1 years after acceptance.		
10	**Maintenance Service During Warranty Period**		
10.1	During warranty period supplier must ensure corrective/breakdown maintenance whenever required.

15. Nebulizer

S.N.	Purchaser's Specifications		Bidder's Offer
	Nebuliser		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Nebuliser is a device used to administer medication to people in forms of a liquid mist to the airways. It is commonly used in treating cystic fibrosis, asthma, and other respiratory diseases.		
2	**Operational Requirements**		
2.1	Heavy duty compact Nebuliser is required.		
3.	**System Configuration**		
3.1	Nebuliser, complete unit with all standard accessories.		
4	**Technical Specifications**		
4.1	Compact, lightweight, low noise.		
4.2	Durable longlife compressor. Suitable for heavy duty/ institutional (hospital) use, must be able to run uninterruptedly for min one hour.		
4.3	Maximum pressure: 2.0 to 2.5bars.		
4.4	Must produce particle of size 1-5µm		
4.5	Aluminium cabinet painted with epoxy powder.		
4.6	Piston-type electric aspirator that offers high performance and great durability.		
4.7	Protective thermal cut out relay.		
4.8	Air delivery rate approx.15l/min.		
4.9	24 hours continuous work for hospital use.		
5	**Accessories, spares and consumables**		
5.1	**Accessories:** • Nebuliser bulb reusable, autoclaveable- 01 no. • Adult and child face mask reusable, autoclaveable- 02 each. • T piece, Mouthpiece, Nosepiece, reusable, autoclaveable- 01 each. • 1 x 200 cm. tubing • Spare filters- 10 nos.		
5.1	All standard accessories, consumables and parts required to operate the equipment, including all standard tools and cleaning and lubrication materials, to be included in the offer. Bidders must specify the quantity of every item included in their offer (including items not specified above).		
6	**Operating Environment**		
6.1	The system offered shall be designed to store and to operate normally under the conditions of the purchaser's country. The conditions include Power Supply, Climate, Temperature, Humidity, etc.		
6.2	Power supply: 220 – 240 VAC, 50Hz fitted with appropriate plug. The power cable must be at least 3 metre in length.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**

	Electric Suction Pump		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	To extract fluid from the body during surgery or emergency treatments.		
2	**Operational Requirements**		
2.1	An electric double jar suction pump for surgical use.		
3	**System Configuration**		
3.1	Suction machine with two bottles and accessories.		
4	**Technical Specifications**		
4.1	It shall be mounted on four robust, fully 360 degree swivelling, antistatic castors, with at least 2 diagonal brakes.		
4.2	Come with suction controller and vacuum gauge / indicator.		
4.3	The pump shall be oil free vacuum pump where the pumped liquid shall be sealed off from the pump.		
4.4	Come with overflow control valves. Bidder shall provide technical design and details of the pump with this TSF		
4.5	Vacuum rate shall be from 0 to not less than 640 mmHg (0.85 bars).		
4.6	Air flow rate shall be at least 25 l/min.		
4.7	The pump shall come fitted with twin unbreakable, transparent, autoclaveable polycarbonate suction bottles minimum 2 litre each.		
4.8	The bottles shall be incorporated with an automatic suction cut-off mechanism when they become full.		
4.9	The suction bottles shall come with overflow lid.		
4.10	Noise level: not more than 55 dBA.		
4.11	Air discharge from pump shall be filtered by a 0.3 micron bacterial hydrophobic filter.		
5	**Accessories, spares and consumables**		
5.1	**Accessories:** • Electrical cable: 1 minimum 3 meter length • Clear suction tubing: 1 set of 5 meter length • Bacterial filter: 0.3 micron, 10 pcs • Spare unbreakable, transparent, autoclaveable polycarbonate suction bottle 2L: 1pc • Complete connection tubing set: 1 set • Hand switch & foot switch with cables for operating easily.		
6	**Operating Environment**		
6.1	The product offered shall be designed to be stored and to operate normally under the conditions of the purchaser's country. The conditions include Power Supply, Climate, Temperature, Humidity, etc.		
6.2	Must operate on 220-240V AC as well as rechargeable batteries.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**

18. ECG Machine

S.N.	Purchaser's Specifications	Bidder's Offer
	ECG Machine, (3 Channel)	
	Manufacturer	
	Brand	
	Type/Model	
	Country of Origin	
	Manufacturer's Authorization Letter	
1	**Description Of Function**	
1.1	ECG Machine is primary equipment to record ECG Signal in various configurations.	
2	**Operational Requirements**	
2.1	Portable digital ECG machine must be able to acquire Simultaneous 3 channel ECG recording with 12 lead simultaneous acquisition with auto summary	
3	**System Configuration**	
3.1	Portable digital ECG machine with complete accessories	
4	**Technical Specifications**	
4.1	Simultaneous acquisition of up to 12 leads	
4.2	Should have TFT Color LCD Display	
4.3	Display to Preview signal quality prior to printing thereby saving time and paper	
4.4	Should have patient data entry feature	
4.5	Should have colour coded keys for ease of operation	
4.6	Should have different mode of printing: Automatic, Manual	
4.7	Should have different sensitivity levels : 2.5,5,10,20,40 mm/mV Auto	
4.8	Recording speeds of 5,10, 25 and 50 mm/sec	
4.9	Should have a high frequency Response: 0.05 Hz to 150 Hz	
4.10	Should have a sampling frequency of 1000 Hz	
4.11	User selectable filter: AC Filter, EMG filter- 25 or 35, Base Line Filter	
4.12	Printer must compatible with Roll ECG paper	
4.13	Light weight – Less than 1.6 Kg	
4.14	Battery operation – Lithium Ion Battery -minimum 10 HRS continuous work.	
4.16	Easy to carry handle	
4.17	Automatic measurement and interpretations of ECGdata.	
4.19	Should have pacemaker detection facility	
4.20	PC interface facility and optional PC interface software (Optional ECG data transferfeature)	
4.21	External storing and retrieving facility through USB storage device	
5	**Accessories, spares and consumables**	
5.1	**Accessories:**

19. Bain Circuit

S.N.	Purchaser's Specifications	Bidders Offer
	Bain Circuit	
	Manufacturer	
	Brand	
	Type / Model	
	Country of Origin	
	Description of Function	
1.1	Bain Circuit is comprises co-axial modification of basic T-piece system which has been developed for facilitating scavenging of waste anesthetic gases. As a tube carrying fresh gas, it travels inside outer reservoir tube to endotracheal tube connector. The process includes patient inspiring fresh gas from the outer reservoir tube and expiring into reservoit tube.	
2	**Technical Specifications**	
2.1	Should be Compact and inexpensive with low dead-space.	
2.2	Should have Low resistance to breathing	
2.3	Should Facilitates scavenging of waste gases.	
2.4	Should be either Sterile or Non- Sterile or Individual Packed	
3	**Standards and Safety Requirements**	
3.1	ISO 9001:2003 or CE if applicable

29. Autoclave, Horizontal, Double Door, 800 litres

S.N.	Purchaser's Specifications	Bidder's Offer
	Autoclave, Horizontal, Double Door, 800 litres	
	Manufacturer	
	Brand	
	Type / Model	
	Country of Origin	
1	**Description of Function**	
1.1	CSSD autoclave shall be able to sterilize wrapped instruments, unwrapped instruments, linen, glassware, liquids.	
2	**Operational Requirements**	
2.1	Microprocessor controlled horizontal electrically heated autoclave is required.	
3	**System Configuration**	
3.1	Autoclave, Horizontal, Double Door, 800 litres, with complete accessories.	
4	**Technical Specifications**	
4.1	Shall have fully automatic operation.	
4.2	The sterilizer shall be pneumatically (Compressed Air) operated, fully automatic double door, triple jacketed chamber front loading.	

हरिश्चन्द्र भिकारी
शस्त्र प्रहरी नायब महानिरीक्षक
अस्पताल प्रमुख

4.3	The autoclave shall be designed to operate on various pre select programs such as pre-vacuum cycle, gravity cycle, porous load cycle, liquid cycle and two standard Bowie Dick test and vacuum leak cycle.	
4.4	Autoclave shall work up to 134-136 °C temperature.	
4.5	It shall come with vertical sliding door, a trolley, a carriage, a steam generator and a dedicated air compressor.	
4.6	**Construction:** • Jacket shall be constructed of heavy duty 304L grade stainless steel. • Door shall be constructed of heavy duty 304L grade stainless steel. • Chamber shall be constructed of heavy duty 316L Ti grade stainless steel. • All the pipes and fittings are made of stainless steel and Brass.	
4.7	Chamber constructed of heavy duty 316L grade stainless steel shall have following features:

	• Chamber shape: Horizontal rectangular design	
	• Chamber dimensions: 660 X 950 X 1800mm (W x H x D) approximately.	
	• Chamber volume: approx. 800+ litres.	
4.8	Shall come with safety features such as:	
	• Door must not open in case chamber is pressurized.	
	• Safety valves for chamber/jacket, current overload relays and contactors for vacuum pump.	
	• Shall have at least two limit switches at the end of door-close position.	
	• The door shall slide down immediately upon sensing an obstruction during closure.	
	• Shall have thick glass wool insulation, tight wrapped with thick silver foil around jacket and door to avoid heat exposure.

सशस्त्र प्रहरी नायब महानिरीक्षक
अस्पताल प्रमुख

4.9	Chamber is provided with two rails for easy/smooth movement of carriage.	
4.10	On the front panel of autoclave there are different pressure gauges for depiction of actual pressure in chamber, jacket and pressure on gasket.	
4.11	Trolley shall be made of high quality 316L SS to transfer carriage from one place to another and shall have foot locks and locking mechanism for carriage while resting above the trolley.	
4.12	It shall be high speed microprocessor control for accurate progression of sterilization cycle. Facility to save and create history log files that can be opened with the support of Microsoft based operating system. Facility to view and operate the cycle progression from remote location.	
4.13	Keypad shall be provided which is used for selecting the cycle and to adjust and feed alphanumeric data. Multiple password access levels (specify number) shall be provided to control access/operation of the machine preventing unauthorized access. These access levels shall be user selectable.	
4.14	Approx. 7" touch screen multi-colour LCD display for preselect program information. The information must include cycle stage, chamber temperature, chamber pressure, jacket pressure along with the information about failures and interrupts. It shall have storage capacity of approx. 200 cycles built-in memory.	
4.15	Documentation: The system shall come with real time built-in printer which gives/prints the real time event during the propagation of cycle such as time in hour, minute, second along with date, load no., operator etc. Any failure is indicated via audio-visual alarm and a print out.

3	**System Configuration**		
3.1	Electronic Adult Weighing Scale on main power as well as battery operated.		
4	**Technical Specifications**		
4.1	Capacity : 150 kg		
4.2	Accuracy : 100 g		
4.3	Display: LED / LCD		
4.4	TARE facility with zero function.		
4.5	HOLD function to lock the weight.		
4.6	The Scale must have inbuilt rechargeable battery backup		
5	**Accessories, spares and consumables**		
5.1	All standard accessories, consumables and parts required to operate the equipment, including all standard tools and cleaning and lubrication materials, to be included in the offer. Bidders must specify the quantity of every item included in their offer (including items not specified above).		
6	**Operating Environment**		
6.1	The system offered shall be designed to be stored and to operate normally under the conditions of the purchaser's country. The conditions include Power Supply, Climate, Temperature, Humidity, etc.		
6.2	Power supply: 220 – 240 VAC, 50Hz Single Phase fitted with appropriate plug. The power cable must be at least 3 metre in length.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO 9001 or ISO 13485:2003/AC: 2007.		
8	**User Training**		
8.1	Must provide user training (including how to use and maintain the equipment).		
9	**Warranty**		
9.1	Comprehensive warranty for 1year.		
10	**Maintenance Service During Warranty Period**		
10.1	During warranty period supplier must ensure corrective/breakdown maintenance whenever required.		
11	**Installation and Commissioning**		
11.1	Supplier must accomplish proper commissioning of the equipment on site.		
12	**Documentation**		
12.1	User (Operating) / service manual in English		

31. AMBU bag with reservoir bag

S.N.	Purchaser's Specifications		Bidder's Remarks
	Bag Valve Mask (BVM)		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	An Ambu Bag (also known as a Bag Valve Mask or BVM or Ambu bag) is a hand-held device used to provide ventilation to a patient who is not breathing or who is breathing inadequately.		
2	**Operational Requirements**		
2.1	It shall be self-inflatable and must have pop up valve (non-return valve), attachment for oxygen tube & oxygen reservoir.		
3	**System Configuration**		
3.1	Ambu bag, complete unit.		
4	**Technical Specifications**		
4.1	Bag must be made up of medical grade silicon, latex free double layered which retain sensitivity and it must be resistant to rough use.		
4.2	Inlet end of the bag must have separate port for Oxygen supplement.		
4.3	Outer port must be such that re-breathing valve or non-return valve can be attached.		
4.4	Must be supplied with Oxygen reservoir bag of 2000ml and shall deliver tidal volumes of 500-800ml		
4.5	It shall be autoclaveable.		
4.6	It shall be adaptable to all type of facemasks.		
4.7	It shall come with appropriate sized facemasks.		
5	**Accessories, spares and consumables**		
5.1	Set to be supplied in a heavy duty, re-sealable plastic pouch or clear top plastic box.		
6	**Operating Environment**		
6.1	The system offered must be designed to store and be operated normally under the condition of the purchaser's Country. The conditions include Climate, temperature and relative humidity.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**		
8	**User Training**		
8.1	Not applicable.		
9	**Warranty**		
9.1	Comprehensive warranty for 1 year after acceptance.		
10	**Maintenance Service during Warranty Period**		
10.1	Standard warranty conditions are applicable.		
11	**Installation, Inspection and Commissioning**		
11.1	Must supply preassembled unit ready to use.		
12	**Documentation**		
12.1	User's manual shall be supplied in English.

	Hemodialysis Machine			
	Manufacturer			
	Brandw			
	Type / Model			
	Country of Origin			
1	**Description of Function**			
1.1	The haemodialysis unit shall be microprocessor control and capable of providing the following features:			
1.2	Acetate and bicarbonate dialysis with UF accuracy of +/- 1%			
1.3	Volumetric ultrafiltration			
1.4	Sodium and UF profilings			
	Built-in clearance monitoring for real time measurement of effective urea clearance (K) and plasma sodium (Na) for therapy assessment.			
	Built-in blood pressure monitoring for measuring the patient non-invasive blood pressure and pulse rate automatically.			
2	The haemodialysis unit shall have an enlarged and high resolution LCD colour screen for dialysis data display.			
3	The haemodialysis unit shall have a multi-color traffic light located on the top of machine monitor indicating the treatment status.			
4	The keyboard function keys and LCD color display shall provide an immediate overview of the machine status for treatment supervision.			
5	The haemodialysis machine should display informative and context related operator guidance, warning messages and alarm reports.			
6	**The haemodialysis machine should include following safety features**			
6.1	Closed System Design			
6.2	Volumetric Ultrafiltration			
6.3	Volumetric Concentrate Dilution			
6.4	Startup test			
6.5	Self test during treatment			
7	The haemodialysis unit shall have an adjustable arterial blood pump flow rate ranging from 15ml/min to 600ml/min. The unit shall be capable of calculating effective blood flow rate and display in a real-time

	basis during dialysis automatically.			
8	The haemodialysis unit shall have an adjustable arterial blood pump segment(both for pediatric and adult) for bloodline diameter from 2mm to 10mm.			
9	The haemodialysis machine shall have diagnostic programme for checking individual valves, pumps, and closed loop tightness.			
10.	The haemodialysis machine shall have user-selectable dialysate flow rate of 300,500, 800 ml/min.			
11	The haemodialysis unit shall have adjustable by setting the sodium concentration. The conductivity measurement range should be 12.8 to 15.7 mS/cm			
12	The haemodialysate unit shall have temperature control range from 32.0 to 38.0 degree Centigrade and temperature alarm limits of 33.5 to 38 degree Centigrade.			
13	The haemodialysis machine shall have the following Volumetric Ultrafiltration Control			
13.1	Control Range : 0 to 4L/hr			
13.2	UF Volume: 0 to 9.99L adjustable in 1ml increment.			
13.3	Treatment time: adjustable upto 9 hours 59 min in 1 min increment			
13.4	Isolated ultrafiltration process shall be provided.			
14	The haemodialysis unit shall be capable of online preparation of bicarbonate dialysis Fluid			
15	The haemodialysis unit shall have a hygienic connection for the ultrapure dialysate fluid filter having endotoxin retention capacity not less than 10^6. The unit shall have to provide a reminder message as the end of filter's service life or maximum number of treatments is about to be reached.			
16	The measurement of effective urea clearance, dialysis dose (Kt/V) and plasma sodium shall be performed in non-invasive, real time mode without additional disposable required during the treatment.			
17	The haemodialysis unit shall be able to operate and monitor the extracorporeal circuit without interruption for at least 15			

S.N.	Purchaser's Specifications	Bidder's Offer	Deviation If Any	Remarks
	min. in case of AC power failure by battery backup.			
18	Concentrate Pump, UF Pump construction shall be stepper motor with diagram.			
19	The haemodialysis unit shall have centrally located function keys for easy use.			
20	**The haemodialysis unit shall have the following features with regards to disinfection and cleaning**			
20.1	Both chemical and heat disinfection shall be performed.			
20.2	Sodium hypochlorite, diluted formaldehyde or paracetic acid may be used as disinfectant			
20.3	Decalcification shall be possible by using citric acid.			
20.4	Various programmable cleansing cycles can be provided with different phases and timings in accordance with different disinfectants.			
20.5	One-touch fully automatic operation including: pre-rinse, chemical-intake for combined disinfection & decalcification, post-chemical mandatory rinse, and automatic power-off, without extra end-user handling during the whole disinfection process.			
21	**The hemodialysis unit shall have the build in non-invasive device for measuring the patient blood pressure automatically with following features:**			
21.1	Measuring Range			
21.1.1	Cuff Pressure Range :10-325mmhg or wider choice			
21.1.2	Systolic Range : 30-280mmHg or wider choice			
21.1.3	MAP Range: 20-255mmHg or wider choice			
21.1.4	Diastolic Range: 10-240mmHg or wider choice			
21.1.5	Pulse rate range : 20-245/min or wider choice			
21.2	Alarm Values			
21.2.1	Systolic Range :90& 165 mmHg			
21.2.2	MAP Range: 70& 120mmHg			
21.2.3	Diastolic Range: 50 & 100mmHg			
21.2.4	Pulse range: 40& 150/min			
22	**Training Requirement**			
	The bidder must provide separate class room

	training followed by practical sessions for clinical issues and operation of the machine to the user preferably before the supplied machine are brought into operation.			
	The bidder must provide technician training about the basic technical issues of the machine to the technical person.			
	Training for the User shall be separately included followed by practical session for the clinical issues and operation of the machine.			
23	**Spares Availability**			
	The bidder shall have ready stock of necessary parts including but not limited to cards, pumps, valves, motors, sensors, and filters for immediate replacement of faulty parts during breakdowns.			
24	The bidder shall confirm the availability of specialized tools (Calibration and other) required for preventive, routine maintenance of offered machine.			
25	**Startup Disinfectant**			
	The bidder shall provide one canister of recommended disinfectant for each machine supplied as a startup consumable.			
26	**Manuals**			
	The bidder shall include one set each operating manual along with the machine. Technical manual should be provided to each of the participant of the technical training.			
27	**Installation**			
	The bidder shall install all the machines without any extra cost and shall submit the installation report along with the measurements and set up detail.			
28	**Quality Assurance Certificate**			
	The bidder shall submit the quality assurance certificate along with the bid. Products with EC/TUV shall be preferred.			
	Must submit ISO13485:2003/AC:2007			
29	**Warranty**			
	2 years of complete maintenance of labour & spares from the date of installation.

34. Resuscitation Cart

S.N.	Purchaser's Specifications		Bidder's Offers
	Resuscitation Cart		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Resuscitation Cart is a set of trays/drawers/shelves on wheels used in hospitals for transportation and dispensing of emergency medication/equipment at site of medical/surgical emergency for life support protocols potentially to save a patient's life.		
2	**Operational Requirements**		
2.1	Stainless steel trolley on stainless steel tubular frame.		
3	**System Configuration**		
3.1	Resuscitation Cartportable with storage units and complete set.		
4	**Technical Specifications**		
4.1	Stainless steel top and shelf, height adjustable, twin hook/loop, IV pole assembly		
4.2	Lockable storage units – at least5 drawers (stainless steel or moulded plastic).		
4.3	Fully, 360 deg. swivel castors/wheels, with at least one castor/wheel to have locking/brake mechanism.		
4.4	Top shelf to have stainless steel guard rail above surface.		
4.5	Fitted with epoxy powder coated oxygen cylinder holder.		
4.6	Manual Resuscitator for Infant, Children & Adult		
4.7	Should have Manually Operated Suction (Foot Suction) Suitable for Infant, Children & Adult.		
5	**Accessories, spares and consumables**		
5.1	All standard accessories, consumables and parts required to operate the equipment, including all standard tools and cleaning and lubrication materials, to be included in the offer. Bidders must specify the quantity of every item included in their offer (including items not specified above).		
6	**Operating Environment**		
6.1	The product offered shall be designed to be stored and to operate normally under the conditions of the purchaser's country. The conditions include Climate, Temperature, Humidity, etc.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO 9001 or ISO 13485:2003/AC:2007 **AND**		
8	**User Training**		
8.1	Not applicable.		
9	**Warranty**		
9.1	Comprehensive warranty for 1 year.		
10	**Maintenance Service During Warranty Period**		
10.1	Standard warranty conditions are applicable.		
11	**Installation and Commissioning**		
11.1	Must supply preassembled unit, ready to use.		
12	**Documentation**		
12.1	User's manual shall be supplied in English.

35. Closed Suction Catheter

S.N.	Purchaser's Specifications		Bidder's Offers
	Closed Suction Catheter		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Closed suction Catheters used to clear unwanted mucus build-up from the airways of ventilated or tracheostomy patients without the need to disconnect the patient from the ventilator or aerosol source		
2	**Operational Requirements**		
2.1	Closed Suction Catheter complete set.		
3	**System Configuration**		
3.1	Closed Suction Catheter complete set.		
4	**Technical Specifications**		
4.1	Should be made ofnon-toxic, non-irritant medical grade material.		
4.2	Color coded control valve for easy identification of the catheter size.		
4.3	Lockable thumb end cap prevents inadvertent suctioning		
4.4	Suction catheter tip should be smooth and soft, rounded to prevent mucosal trauma.		
4.5	Should be supplied in sterile pack		
5	**Accessories, spares and consumables**		
5.1	Set to be supplied in a heavy duty, re-sealable plastic pouch or clear top plastic box.		
6	**Operating Environment**		
6.1	The system offered must be designed to store and be operated normally under the condition of the purchaser's Country. The conditions include Climate, temperature and relative humidity.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**		
8	**User Training**		
8.1	Not applicable.		
9	**Warranty**		
9.1	Comprehensive warranty for 1 year after acceptance.		
10	**Maintenance Service during Warranty Period**		
10.1	Standard warranty conditions are applicable.		
11	**Installation, Inspection and Commissioning**		
11.1	Must supply preassembled unit ready to use.

S.N.	Purchaser's Specifications		Bidder's Offers
	Glucometer with test strips		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Glucometer is used to measure blood glucose levels		
2	**Operational Requirements**		
2.1	Glucometer with test strips, complete set		
3	**System Configuration**		
3.1	Glucometer with test strips, complete set		
4	**Technical Specifications**		
4.1	Should be a hand held, Light weight with replaceable battery		
4.2	Should have LCD display with reading range/linearity from approx. 20 to 600 mg/d.		
4.3	Reading time should be of less than 10 seconds		
4.4	Should use a minimum blood sample less than 1.5µl		
4.5	Should have a minimum memory of approx. 50		
4.6	Strips should be available in the local market		
5	**Accessories, spares and consumables**		
5.1	Test strips –200pieces		
5.2	Covering case – 1no.		
6	**Operating Environment**		
6.1	The system offered must be designed to store and be operated normally under the condition of the purchaser's Country. The conditions include Climate, temperature and relative humidity.		
7	**Standards and Safety Requirements**		
7.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**

43. Fluid Warmer

S.N.	Purchaser's Specifications		Bidders Offer
	Blood Warmer		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Fluid Warmer is used for warming fluids, crystalloid, colloid or blood product, prior to being administered to body temperature level.		
2	**Technical Specifications**		
2.1	Flow Rates should be from kvo to 150ml/min.		
2.2	Should have temperature range of 36°C to 42°C		
2.3	Should be easily transportable		
2.4	Should able to attach to IV pole and standard electrical sockets		
2.5	Should use dry heat technology		
2.6	Should have audible and visual alarms for Temperature		
2.7	Should have automatic cutoff for set temperature		
2.8	Should be easy to use and to clean		
2.9	Warm up time should be less than 60 seconds		
2.1	Consumables should have built in filter		
5	**Accessories, spares and consumables**		
5.1	**Accessories:** disposable adult warming sets -5 disposable pediatric warming set-1

43. Fluid Warmer

S.N.	Purchaser's Specifications	Bidders Offer
5.2	All standard accessories/consumables/parts required for the proper operation of the above item shall be included in the offer. Bidders shall specify, in a separate Excel worksheet, the quantity and details of any items included in this offer which have not been specified in this Technical Specifications Form.	
6	**Operating Environment**	
6.1	The product offered shall be designed to be stored and to operate normally under the conditions of the purchaser's country. The conditions include Climate, Temperature, Humidity, etc.	
6.2	Power supply: 220-240 VAC, 50Hz single phase as appropriate fitted with appropriate plug. The power cable must be at least 3 metre in length.	
7	**Standards and Safety Requirements**	
7.1	Should submit ISO 9001 or ISO 13485:2003/AC: 2007 or CE if applicable.	
8	**User Training**	
8.1	Not applicable.	
9	**Warranty**	
9.1	Not applicable.	
10	**Maintenance Service During Warranty Period**	
10.1	Not applicable.	
11	**Installation and Commissioning**	
11.1	Not applicable.	
12	**Documentation**	
12.1	User's manual in English

44. Physiotherapy chest vibrator

S.N.	Purchaser's Specifications		Bidder's Offers
	Physiotherapy chest vibrator		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Physiotherapy chest vibrator used to perform postural draining to help COPD patient clear mucus from their airways.		
2	**Operational Requirements**		
2.1	Physiotherapy chest vibrator complete set.		
3	**System Configuration**		
3.1	Physiotherapy chest vibrator complete set		
4	**Technical Specifications**		
4.1	Should be portable and light weight		
4.2	Speed should be approx. 4500rpm		
4.3	Maximum temperature approx. 55^0C		
5	**Operating Environment**		
5.1	The system offered must be designed to store and be operated normally under the condition of the purchaser's Country. The conditions include Climate, temperature and relative humidity.		
5.2	Power supply – 220V, 50Hz		
6	**Standards and Safety Requirements**		
6.1	Must submit ISO13485:2003/AC:2007 for Medical Devices **AND**		
7	**User Training**		
7.1	Not applicable.		
8	**Warranty**		
8.1	Comprehensive warranty for 1 year after acceptance.		
9	**Maintenance Service during Warranty Period**		
9.1	Standard warranty conditions are applicable.		
10	**Installation, Inspection and Commissioning**		
10.1	Must supply preassembled unit ready to use.		
11	**Documentation**		
11.1	User's manual shall be supplied in English.

45. Intermittent pneumatic Compression Device

S.N	Purchaser's Specifications	Bidder's Offer
	Manufacturer	
	Brand	
	Type / Model	
	Country of Origin	
1	**Description of Functions**	
1.1	Intermittent pneumatic compression is a therapeutic technique used in medical devices that include an air pump and inflatable auxiliary sleeves, gloves or boots in a system designed to improve venous circulation in the limbs of patients who suffer edema or the risk of deep vein thrombosis or pulmonary embolism	
2	**Technical Specifications**	
2.1	Should have LCD Screen,touch screen operating, real-time display the parameter of treatment status.treatment part, integrated mode, remaining time, true pressure of every cavity, Inflatable speed etc.	
2.2	Treatment time- 1 min-99 min, adjustable	
2.3	Pressure Range - 0-200mmHg	
2.4	Pressure Holding Time 1s-6s	
2.5	Cycle Interval Time 1s-6s	
2.6	Power Supply AC220V/50HZ	
3	Certification should be provided if applicable (ISO/ CE)	
4	User training/ Technician training if applicable

46. Forced Air Warmer Device (Patient Warmer Device)

S.N.	Purchaser's Specifications		Bidders Offer
	Forced air warmer device		
	Manufacturer		
	Brand		
	Type / Model		
	Country of Origin		
1	**Description of Function**		
1.1	Forced Air Warming Device is used for the prevention hypothermia.		
2	**Operational Requirements**		
2.1	For the safe and controlling warming of patients in the Operating Theatre, Emergency Department, ICU and warm setting.		
3	**Technical Specifications**		
3.1	It must be compact and robust and Unobstructive.		
3.2	The unit must be lightweighted.		
3.3	The unit should have a handle and there should be a mechanism to secure to a drip stand or bed.		
3.4	The control panel must be well sealed preventing entry of fluids to the internal working and circuits of the unit.		
3.5	The Forced air warmer musr have at least 3 selectable temperature settings as follows: i) Low: set value between 30-34°C ii) Medium: set value between 35-39°C iii) High: set value between 39-43°C Accuracy must be within 1.5°C for all setting.
